ALL WEATHER | WELCOME

For over 50 years All Weather has hand crafted exceptional custom aluminum windows & doors. Utilizing the highest quality materials and applying the superior workmanship of true artisans, we have breathed life into thousands of residential and commercial building projects up and down the entire west coast and beyond.

Over the decades, All Weather’s ability to provide creative solutions to challenging projects has been the company’s cornerstone and continues to set All Weather apart from our competition. In fact, offering custom products for our clientele and not competing with mass quantity producers is our primary purpose.

We believe in service beyond expectation and we achieve this by listening to you. We want you to understand that whether this is your first project with us, or your 100th, our pledge remains the same: We are here to support you by providing expert product knowledge, a world-class customer service experience and on-time delivery of the best aluminum windows and doors on the planet.

Now under 3rd generation family ownership, our desire to foster deep and meaningful relationships in order to drive All Weather’s growth and prosperity remains unwavering. We value you, your business and the opportunity to make each of your projects more amazing with our stunning windows and doors.

Welcome to All Weather.

ALL WEATHER | CUSTOM WINDOWS

All Weather windows put an exquisite frame around the moments of you or your clients' lives. Whether our products provide a view out into your garden or onto a quad, the perfect spot to look out on the city or your backyard, or a corner or home office flooded in natural light, we build our exceptional custom windows with memories in mind.

Not only do All Weather windows beautify your home or commercial projects, but they are also perfectly functional, energy efficient, and incredibly secure. It is our goal to provide you an experience that will help you find the ideal window to match the design aesthetic you or your clients are working to achieve.

On the following pages you will find our full line of window systems with photos, product details and information to help you visualize the possibilities of making beautiful custom windows a part of your home or next build.

SERIES 5000 | 2 ¼" WINDOW SYSTEM

FEATURES

- 2 ¼" Frame with mitered corners
- Fixed, casement, awning, hopper & combination configurations
- Max casement size of 36" x 60"
- Max fixed lite size 50 square feet
- Exterior glazed
- Thermally broken frame – Pour & Debridge system
- Flat magnetic screen with charcoal mesh or optional Ultra Vue clear mesh

FRAME OPTIONS

- Nail On, Panning Nail On, Equal Leg / Comp Channel, Equal Leg / F-Clip, Z-Bar

GLAZING OPTIONS

- 1" OA insulated units
- 1" Simulated Divided Lite (SDL) – Flat or beveled bar
- 2 ¾" True Divided Lite (TDL) – Square or beveled bead

HARDWARE OPTIONS

- Roto operator with butt hinges
- Cam handle friction hinge
- Multi-point lock with roto operator

RATINGS & CERTIFICATION

- NFRC Certified Product
- Performance Grade Rating PG50
- Acoustically Rated

The Series 5000 Window System is All Weather's most popular and cost effective thermally broken window design. Utilizing a pour & debridge thermal break, the Series 5000 offers energy efficiency without sacrificing performance or aesthetics.

Utilizing extruded, age hardened aluminum that boasts a T-6 rating for strength and durability, the Series 5000 window is built to last with a wall thickness that meets or exceeds commercial window standards. Economical, durable and beautiful, the Series 5000 is the ideal projected custom window solution for residential and multi-family applications.

SERIES 6000 | 2 ½" WINDOW SYSTEM

FEATURES

- 2 ½" Frame with mitered corners
- Fixed, casement, awning & combination configurations
- Max casement size of 36" x 72"
- Max fixed lite size 60 square feet
- Thermally broken frame – Thermal strut system
- Flat magnetic screen with charcoal mesh or optional Ultra Vue clear mesh

FRAME OPTIONS

- Nail On, Panning Nail On, Equal Leg / Comp Channel, Low Profile

GLAZING OPTIONS

- 1" OA insulated units – 1 ½" OA triple glazed
- 1" Simulated Divided Lite (SDL) – Flat bar
- 2 ½" True Divided Lite (TDL)

HARDWARE OPTIONS

- Roto operator with butt hinges
- Cam handle friction hinge
- Multi-point lock with roto operator

RATINGS & CERTIFICATION

- NFRC Certified Product
- Performance Grade Rating PG80
- Acoustically Rated

The Series 6000 window system is one of All Weather's most energy efficient and highest rated window designs and is an ideal exterior glazed solution for residential applications and buildings 12 stories and under.

Built to meet virtually any design and performance criteria for an aluminum window product, the commercially rated Series 6000 window's mitered and crimped corners provide exceptional strength and a contemporary aesthetic. The thermally strutted frame increases energy efficiency and allows for split finish options for the interior and exterior for maximum design flexibility.

SERIES 6100 | 3 ¾" WINDOW SYSTEM

FEATURES

- 3 ¾" Frame with mitered corners
- Fixed, casement, awning & combination configurations
- Max casement size of 48" x 96"
- Max fixed lite size 60 square feet
- Thermally broken frame – Thermal strut system
- Concealed hinges for contemporary aesthetic
- Extruded aluminum screen with charcoal mesh or optional Ultra Vue clear mesh

FRAME OPTIONS

- Nail On, Block Frame

GLAZING OPTIONS

- 1" OA insulated glass units – 1 ¼" OA triple glazed
- 1" Simulated Divided Lite (SDL) – Flat Bar
- 3 ⅜" True Divided Lite (TDL)

RESIDENTIAL HARDWARE OPTION

- Encore Contemporary handle
- Amesbury Truth High Performance Single Arm Operator
- Max casement width 42" and min casement width 23 ½"
- Max casement height 72" when width is greater than 30"
- Max casement height 78" when width is equal to or less than 30"
- Supports sash up to 140 lbs.

COMMERCIAL HARDWARE OPTION

- European style Fapim Out System
- Handle rotation allows for sash lock, unlock and actuation. Max 4" opening distance.
- Supports sash up to 280 lbs.
- Max casement width 48" and min casement width 23 ½"
- Max casement height 96"
- ADA compatible handle available

RATINGS & CERTIFICATION

- NFRC Certified Product
- .30 U Value or better to meet Title 24 compliance
- Performance Grade Rating PG60
- Acoustically Rated

The Series 6100 Window System is All Weather's newest, most optimized, energy efficient window design. The 6100 is All Weather's first window system engineered to meet Title 24 compliance using the Prescriptive Method.

The all-new aluminum extrusion design provides a contemporary aesthetic and utilizes All Weather's state-of-the-art insulated glass production capabilities. The Series 6100 delivers best-in-class energy efficiency and is the perfect choice for residential applications and exterior glazed solutions for buildings 12 stories and under.

- $\frac{5}{8}$ ", $\frac{7}{8}$ ", 1" Simulated Divided Lite (SDL) – Square or putty
- 3 $\frac{1}{4}$ ", 4 $\frac{5}{16}$ " True Divided Lite (TDL) – Based on profile

HARDWARE OPTIONS

- Ladder Pull in varying lengths
- Acacia Handle
- Multi point locking, thumb turn or keyed lock available

RATINGS & CERTIFICATION

- NFRC Certified Product

The Series 7200 Pivot door is a unique and breathtaking alternative to traditional French or hinged doors. Pivot doors offer an elegant and contemporary aesthetic that will complement any home.

The Series 7200 allows openings to accommodate taller and wider panels since the door operates around a pivot at the top and bottom of the door rather than being hinged to the jamb.

The Series 7200 Pivot door can be used as a front, internal or patio door and offers uninterrupted views through a single panel of glass, increased daylighting and is an ideal solution to merge indoor outdoor spaces for residential and commercial applications.

SERIES 8100 | MULTI SLIDE DOOR SYSTEM

FEATURES

- Max panel width of 96" and min panel width of 24"
- Max panel height of 144" and min panel height of 48"
- Max panel size of 70 square feet
- Unlimited number of panels
- Pour & Debridge thermally broken frames with Thermal strut system panels
- Optional full panel screen available
- Optional retractable pleated screen available
- Square cut corners, mechanically fastened

FRAME & SILL OPTIONS

- Block frame with optional stucco return
- 2" Sill, 1 ½" Mid Rise sill, ¾" Low Profile sill and Recessed Tile sill available

CONFIGURATIONS

- Unlimited multi track configuration
- Flush Stacking Multi Slide Doors for true bypass panels
- Pocket Doors, 90 Degree Corner Doors

GLAZING OPTIONS

- 1" OA insulated glass
- 1" Simulate Divided Lite (SDL) – Flat bar
- 1 15/16" True Divided Lite (TDL)
- Enhanced Noise Reduction (STC)

HARDWARE OPTIONS

- Flush mount or modern D pull handle
- Keyed lock available
- 3" Stainless Steel rollers
- 1.8" Quadzilla Low Profile Stainless/Composite rollers

RATINGS & CERTIFICATION

- NFRC Certified Product
- Commercial Rating C30
- Acoustically Rated

The Series 8100 Multi Slide Door System is All Weather's most innovative, energy efficient and versatile design. The Series 8100 offers unlimited possibilities with corner, pocket, and flush stacking door configurations.

Held to the highest standards of quality and performance, the Series 8100 is commercially and acoustically rated, boasts smooth operation, and features a low profile sill, multiple thermal breaks and contemporary narrow sightlines. The Series 8100 Multi Slide Door System is the perfect choice for residential applications but can also meet your commercial project needs.

SERIES 8150 | 3 ¾" SLIDING DOOR SYSTEM

FEATURES

- Max panel width of 96" and min panel width of 24"
- Max panel height of 144" and min panel height of 48"
- Max panel size of 70 square feet
- Up to 4 panels wide
- Thermally broken frame – Pour & Debridge system
- Stronger single-piece 6063-T6 aluminum two-track frame
- Integrated, economical screen design
- Improved water weeping system

FRAME & SILL OPTIONS

- True Nail On or block frame available
- 1 ⅞" Sill and ¾" Low Profile sill available

CONFIGURATIONS

- OX, XO
- OXO
- OXXO

GLAZING OPTIONS

- 1" OA insulated glass
- 1" Simulated Divided Lite (SDL) – Flat Bar
- 1 15⁄16" True Divided Lite (TDL)

HARDWARE OPTIONS

- Flush mount or modern D pull handle
- 1.8" Tandem stainless steel rollers standard, up to 600 lb. panel weight
- 1.8" Quadzilla stainless steel rollers for heavy panels, up to 1200 lb. panel weight

RATINGS & CERTIFICATION

- NFRC Certified Product
- Commercial Rating C35
- Acoustically Rated

The Series 8150 is All Weather's newest thermally broken sliding door system. The Series 8150 sliding door is a two track system designed to simplify and improve the installation experience for commercial, mid-rise, mixed use and residential projects.

The all-new aluminum extrusion design provides a contemporary aesthetic and combined with All Weather's state of the art insulated glass production capabilities, the 8150 delivers enhanced energy performance.

The new Series 9200 Folding Door system completely transforms space and enhances indoor outdoor living by allowing more natural light and open air and maximizing views. Top hung for smooth and effortless operation, the innovative Series 9200 bifold doors are thermally broken for increased energy efficiency, feature a contemporary 2 1/16" stile & rail profile and robust 2 3/8" thick panels for structural integrity.

Whether you need a simple bi-fold patio door or want to open an entire wall, the Series 9200 unlimited configuration options offer maxim design flexibility. Held to the highest standards of quality and performance, the Series 9200 Folding Door System is the ideal solution for residential and commercial projects.

ALL WEATHER | SLIDING DOOR SCREENING SYSTEMS

SERIES 8100 MULTI SLIDE DOOR

INTEGRATED RETRACTABLE PLEATED SCREEN

- Smooth operation and slim profile
- Integrated frame design only adds 1 ½" track to the door frame depth regardless of the number of multi slide door panels
- Available in single or bi-parting double screen configuration
- Max Single Screen size of 192" x 126"
- Max Double Screen size of 384" x 126"
- Black pleated mesh screen retracts into the frame
- Integrated screen track finish matches the multi slide door frame
- Integrated retractable pleated screen is not available for retrofit applications or pocketing multi slide configurations

PANEL SCREEN

- Smooth operation and same profile as the door panel with a screen insert
- Optional single panel screen in the interior for a multi slide door
- Optional panel screen on the exterior for every operable multi slide door (e.g. OXXX would have 3 panel screens)
- Adds 2" track per panel to the door frame depth
- Max screen panel size 72" x 144"
- Available in Clear and Dark Bronze
- Mesh options include Charcoal Mesh or Ultraview Mesh

SERIES 8150 SLIDING DOOR

EXTRUDED ALUMINUM SCREEN DOOR

- Easy operation and slim profile
- Integrated screen track design
- Max screen size of 72" x 130"
- Profiles available in Clear and Dark Bronze
- Mesh options include Charcoal Mesh, Ultraview Mesh, Black Wire Mesh, and Clear Wire Mesh

From patio screen doors to panel screen doors to an integrated retractable pleated screen for larger openings, All Weather offers a comprehensive range of sliding door screening solutions to fit all your project needs.

Easy to install, our sliding door screening systems provide excellent ventilation, fresh air flow and easy access to the outdoors while keeping insects and debris out.

All Weather windows and doors feature Class I anodized coatings which are a high-performance finish used for exterior building structures and other products that must withstand continuous outdoor exposure. Class I anodized finishes are more resistant to salt spray and the sea coast as compared to Class II. Custom Kynar paint color matching available for commercial projects.*

CLASS 1 DARK BRONZE ANODIZED
SOPHISTICATED AND TIMELESS, DARK BRONZE FITS IN HOMES WHERE A MORE TRADITIONAL AESTHETIC IS DESIRED.

CLASS 1 CLEAR ANODIZED
SLEEK AND MODERN, THE 'ALUMINUM LOOK' IS BEST SUITED FOR CONTEMPORARY DESIGN TASTES AND STYLES.

GLASS | ENERGY EFFICIENCY (NFRC)

LOW E (LOW-EMISSIVITY) | **CARDINAL CG**

Low E is a transparent coating used to minimize the amount of infrared and ultraviolet light that passes through a piece of glass. This coating improves energy performance in windows by reflecting exterior heat during warmer seasons and retaining interior heat during colder seasons.

Cardinal LoE-270 (LoE-270) provides enhanced energy levels of performance with its patented two-layer coating for year-round comfort.

Cardinal LoE-366 (LoE-366) is the ultimate performance glass and delivers the highest levels of year round comfort and energy savings. LoE-366's patented triple-layer coating rejects the sun's heat, provides exceptional fading protection while still letting light stream in. Pair it with argon gas and LoE-189 for maximum energy efficiency.

TINTS

Tinted glass is available in a wide range of colors to meet your visual and energy performance needs. Bronze, Grey, Green and Blue are our most popular options.

LAMINATED

Laminated glass is a safety glass that is two pieces of glass bonded together with a plastic interlayer. This interlayer helps strengthen the glass against impact and, if damage does occur, the plastic will hold the broken shards together limiting the risk of injury from the glass. Laminated glass is also used as a moderate acoustical pane, offering some sound barrier.

OPTIPHON SOUND CONTROL

Pilkington Optiphon™ is a laminated glass that utilizes a special PVB interlayer that enhances sound insulation performance. Using this glass in place of a clear pane can provide excellent sound control with the same benefits as laminated glass.

ARGON FILLED

Argon is a colorless and odorless dense gas that helps improve energy performance. Argon gas can be injected between two panes of glass in insulated glass units to achieve better energy ratings.
