## SERIES 5000 WINDOWS

PRODUCT SPECIFICATIONS \| EXTRUSION DETAILS \| TEST REPORTS

ALL WEATHER architectural aluminum

## SERIES 5000 $21 / 4 "$ ALUMINUM WINDOWS

## INTRODUCTION

Our Series $500021 / 4 "$ product line uses 6063 extruded aluminum and are age hardened to a T-6 rating for strength and durability. The Series 5000 windows have integral extrusion walls with a nominal web thickness of .125", and a wall thickness of .094". The nailing fins are .062" thick. The material thickness on all wall sections meets or exceeds commercial window standards.

The pour and debridge thermal break profiles are extruded as a single extrusion with a cavity for the thermal break material. Once the profile is extruded, the cavity is filled with a two part polyurethane that has a low coefficient of thermal conductivity. After the polyurethane has cured, a saw is used to debridge the profile by ripping the aluminum web of the cavity. The profile is now thermally broken, providing both improved thermal performance as well as improved condensation resistance.
The Series $500021 / 4$ " window line is available in the following finishes:

- Class I Clear Anodized**
- Class I Bronze Anodized**
- Standard White
- Custom Anodized
- 70\% Kynar Paint Color
** Indicates Finishes In Stock.

## STRUCTURAL TESTING

Our Series 5000 projected, casement and fixed windows have been tested to AAMA/WDMA/CSA101/1.5.2/A440-05 standards as listed below: (Please see test reports located in the back of this section for window sizes.)

- Fixed Window FW - C60
- Casement Combination Window 00/XX/O0 C50
- Awning and Hopper Combination Awning / Awning / Fixed / Hopper C50
- Awning Combination 2 Wide Fixed / 2 Wide Awning C50
- Casement Combination Window X0XX C50

All Weather has comprehensive files containing all historical testing. Each of the tests in the proceeding list are current, however, our archived testing may be more specific for your particular project and will be provided upon request.

## ACOUSTICAL TESTING

All Weather has completed acoustical testing on several window configurations and glass make-ups, including the test results listed below. Additional testing has been performed and can be provided upon request.

- STC 41 / OITC 32 Fixed Awning Combo 8.8 mm Lami Over ¼" Glass
- STC 41 / OITC 33 Fixed Casement Combo 8.8 mm Lami Over 3/16" Glass

## CONSTRUCTION

Corners of frame and ventilators are mitered and welded for structural integrity. All muntin and other intermediate bars are firmly attached to their cross joints and their abutting sash sections. The frame sill, vents, and intermediate bars contain weep provisions and are sloped for positive drainage to the exterior. Frames are drilled and tapped to receive screen attachment hardware as required. All surfaces to be glazed have a bead retaining notch.

## HARDWARE

Projected \& Casement Windows: Vents shall operate on 4-bar heavy duty stainless steel hinges, and have die cast zinc cam handles with pole ring. Project-in type units use a snaplock or cam handle with pawl. White bronze hardware or brushed nickel hardware is available upon request.

Series 5000 awning and casement alternate: A worm gear rotary control operator with butt hinges and side mounted locking handle is provided for each casement ventilator. Casements can have a multipoint lock system upon request. Awnings can also be equipped with worm gear rotary hardware with loose pin/concealed hinges and locking handles on the jambs.

ALL WEATHER
architectural aluminum

## SERIES 5000 $21 / 4 "$ ALUMINUM WINDOWS (coorimed)

## SCREENS

Screens are made of painted roll formed aluminum to match the window frame and use charcoal fiberglass mesh with plastic wicket doors. Wire mesh and Ultraview mesh screens are available upon request. The screens are installed and are removable from the inside of the building (Exception: Our project-in hopper screen is mounted on the exterior).

Series 5000 rotary casement and awning windows will have flat screens, also removable from inside the building. Flat screens are made with extruded screen channel with mitered corners and an internal corner key.

## GLAZING

The Series 5000 offers a 1" OA on insulated glass units. Series 5000 offers square or beveled extruded bead.

## WEATHER-STRIPPING

Our Series 5000 casement, awnings, and project-in windows are weather stripped with a santoprene, 64A durometer black bulb insert. It is inserted in an extruded slot at the perimeter of the vent or opening. Two (2) rows are used to ensure low air infiltration and weather penetration prevention. The bulb seal can be replaced in the field after installation, if necessary, for maintenance purposes.

## INSTALLATION GUIDELINES

- All windows must be installed in prepared openings in accordance with AAMA recommendations and the below-listed manufacturers' recommendations (If shop drawings are required, please refer to approved shop drawings for installation):
- All vent panels must be closed and locked.
- Each unit must be installed level, plumb and square with a $1 / 4$ " clearance on the jambs and the header of the window.
- Remove wet plaster, mortar, stucco and cement immediately. (Note: windows should only be cleaned with mild soap and water.)
- Do not set items on the sill.
- In nail-on applications, a bead of caulking material should be applied to the inside nail-on fin just before installation to insure a water tight seal between the building and the window. In an equal leg window a bead of caulking material should also be applied.
- Any attachment screws or bolts should be sealed during the process of installation.
- After installation is complete, building paper and stucco wire (if a stucco application) should overlap the window nail-on flange.
- For installation instructions please contact sales.

## CARE \& MAINTENANCE

- Windows should be kept free of all dust, dirt, paint and plaster.
- The sill should be kept clean at all times. A vacuum cleaner with a crevice attachment is recommended.
- Window should only be cleaned with mild soap and water.
- Caution: Damage will occur to the frame finish, and to the sealed glass unit, if solvents, petroleum products, or caustic chemicals such as acetone or paint thinner are used to clean window frames. Damage caused by this type of abuse is not covered under warranty.

ALL WEATHER architectural aluminum

## SERIES 5000 LIMITED WARRANTY

## ALUMINUM WINDOWS \& DOORS ONE (1) YEAR LIMITED WARRANTY

All Weather Architectural Aluminum, Inc. guarantees to the original registered owner occupant at the location of original installation of the products or components, that in the event the products or components fail to meet industry standards for performance against defects in material or workmanship within one (1) year from the date of manufacture, we will, at our sole discretion, repair, replace or refund the purchase price of the products or components. Broken glass or damage due to improper installation or abuse are not covered by this warranty. Industry standards are defined by the American Architectural Manufacturers Association (AAMA), WDMA (Window \& Door Manufactures Association and CSA (Canadian Standards Association), (AAMA/WDMA/CSA 101/I.S.2/A440)

## INSULATED GLASS TEN (10) YEAR LIMITED WARRANTY

Every All Weather insulated glass unit is warranted for a period of ten (10) years from the date of manufacture except in the case of insulating glass containing decorative internal grids which are warranted for a period of one (1) year. All Weather warrants that under normal conditions of residential or light commercial use and service, moisture condensation, dust, and other foreign particles inside of the dead air space and/or loss of insulating value due to leakage of the unit at the sealed edges will not occur. In the event of a failed unit, All Weather will provide a replacement unit at no cost to the customer, or at its option, refund the original purchase price of said unit. This warranty applies to original units only, and does not include removal or re-installation after one (1) year from original installation date.

## WARRANTY IS SUBJECT TO THE FOLLOWING CONDITIONS \& TERMS

- All Weather's obligations under this warranty are expressly conditioned upon payment in full for the products. In the event of a default in payment, the products are sold "as is, with all faults" and without any warranty express or implied. In no event shall any delay in payment serve to toll the running of the applicable warranty term of one (1) year.
- The warranty on replacement products is limited to the remainder of the warranty period on the original products. Replacement products will be shipped FOB original customer. Replacement products shall be those that are currently available to All Weather at the time of replacement. Such replacement products will be reasonably similar to but may not exactly match the products being replaced.
- This warranty does not include removal or re-installation.
- All Weather will not assume liability for glass breakage or damage caused by improper glazing, All Weather windows shipped open for field glaze, improper installation, vandalism, misuse, abuse, or acts of nature including earthquake, flood, and fire, or damage resulting from use in sloped glazing installations or improper treatment including exposure to any chemicals or substances detrimental to the insulating seal of the units; faulty building construction or design; or in conditions where water or moisture can accumulate and remain around the sealed edges of the units. This warranty does not cover single pane glass or IG units that are field glazed, regardless of glass supplier, to include All Weather supplied glass / units. Customer supplied glass is not covered
- The warranty applies only to the original registered owner-occupant at the location where the products were originally installed and is not transferable.
- The paint surface of any special painted material is not covered under this warranty. Warranty claims for special paint must be filed with the paint vendor and are subject to their warranty terms and conditions.
- This warranty is void where units are installed in other than a normal residential or light commercial application or in any environment where units are exposed to excessive temperature gradients from surface to surface.
- All Weather products installed within 4 miles of a coastline require coastal hardware. Non-coastal hardware within 4 miles of a coastline is not covered under this limited warranty. Finish failure and/or corrosion of aluminum or specialty finishes on windows or doors within 4 miles of a coastline carries a 1 year limited warranty.

DISCLAIMER OF WARRANTY: WITH THE SOLE EXCEPTION OF THE EXPRESS WARRANTY SET FORTH HEREIN, ALL WEATHER DISCLAIMS ANY OTHER WARRANTIES, WHETHER EXPRESS OR IMPLIED (INCLUDING THE IMPLIED WARRANTY OF MERCHANTABILITY AND THE IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE), OR ARISING BY OPERATION OF LAW, TRADE USAGE OR COURSE OF DEALING.
This Warranty gives you specific legal rights and you may also have other rights, which may vary from state to state. THIS WARRANTY IS NOT A WARRANTY OF FUTURE PERFORMANCE OR A STATEMENT OF THE USEFUL LIFE OF ANY ALL WEATHER PRODUCTS, BUT ONLY A WARRANTY TO REPAIR, REPLACE, OR REFUND. Where disclaiming or limiting of implied warranties is prohibited by law, the duration of any implied warranty is limited to the duration of this express warranty, claims must be presented within the same time and in the same manner, and the relief shall not exceed that set forth herein.
LIMITATION OF REMEDIES: UNDER NO CIRCUMSTANCES WILL ALL WEATHER BE LIABLE FOR INCIDENTAL, INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES WHETHER BASED ON BREACH OF EXPRESS OR IMPLIED WARRANTY, BREACH OF CONTRACT, NEGLIGENCE, STRICT LIABILITY OR ANY OTHER LEGAL THEORY. Such damages include but are not limited to those for personal injury, lost rents or profits, loss of use, claims of third parties, property damage claims or any claims arising from or alleged to have arisen from any breach of the warranty contained herein. All Weather is not responsible for repairing, refinishing, repainting or replacing any building materials or components associated with any warranty work, or for labor and materials as well as disposal costs associated with the installation of complete window products in replacement of previously installed defective products. The purchaser's sole and exclusive remedy is limited to the legal remedies described in this warranty. The statute of limitations applicable to all claims arising under this warranty shall be one (1) year from the date the claim accrues.
If All Weather provides any of the remedies identified in the Warranty above (repair, replacement of product or refund of purchase price), then purchaser / end user agrees that this limitation of remedy shall not have failed of its essential purpose.
No employee representative, or dealer of All Weather is authorized to modify, expand or change this warranty. The original purchaser of the AWAA products covered hereunder acknowledges that they have read and understand the warranty and are bound by its terms and agree to provide this warranty to the original owner-occupant of the property where the products are originally installed.

No Waiver: All Weather may, in its discretion and goodwill, provide benefits or services beyond what is covered under this warranty. Any such provision of benefits or services shall be limited to the specific instance in which it is provided and does not constitute admission of any defect or a waiver of All Weather's right to strictly enforce the exclusions, disclaimers, and limitations set forth in this warranty in any or all other circumstances.

AAMA/WDMA/CSA 101/LS.2/A440-05, Standard/Specification for Windows, Doors, and Unit Skylights

### 5.0 Test Specimen Description:

### 5.1 Product Sizes:

| Overall Area: | Width |  | Height |  |
| :---: | :---: | :---: | :---: | :---: |
| $5.41 \mathrm{~m}^{2}(58.23 \mathrm{ft})$ | millimeters | inches | millimeters | inches |
| Overall size | 1613 | $63-1 / 2$ | 3353 | 132 |
| Active Panel | 797 | $31-3 / 8$ | 1520 | $59-13 / 16$ |

5.2 Frame Construction:

| Frame Member | Material | Deseription |
| :---: | :---: | :--- |
| Head, Sill, <br> and Jambs | Aluminum | Extruded aluminum with poured and debridged <br> thermal break. |
| Mullions | Aluminum | Extruded aluminum with poured and debridged <br> thermal break. |
|  | Joinery Type | Detail |
| Frame corners | Mitered | Joints were welded and sealed with seam sealer. <br> Horizontal <br> Mullion joints <br> CopedMullion ends were coped and tabs were staked <br> through slots at each jamb; sealed with seam <br> sealer. |
| Vertical Mullion <br> Joints | Coped | Vertical mullions were coped and welded to each <br> horizontal mullion, coped and tabs staked <br> through slots at head and sill; sealed with seam <br> sealer. |

## SERIES 5000 TESTING

The specimen was installed into a Douglas fir buck. The rough opening allowed for a $1 / 4^{\text {" }}$ shim space. The exterior perimeter of the window was sealed with silicone.

| Location | Anchor Description | Anchor Location |
| :---: | :---: | :---: |
| Nail fin | $1 / 4^{*} \times 2^{-1}$ Phillips flat head |  |
| screw |  |  | | $2-1 / 2^{\prime}$ from each corner, |
| :---: |
| spaced $8-1 / 2^{\prime \prime}-13^{\prime \prime}$ on center. |

7.0 Test Results: The temperature during testing was $18^{\circ} \mathrm{C}\left(64^{\circ} \mathrm{F}\right)$. The results are tabulated as follows:
$\left.\begin{array}{|c|c|c|c|}\hline \text { Title of Test } & \text { Results } & \text { Allowed } & \text { Note } \\ \hline \begin{array}{c}\text { Operating Force, } \\ \text { per ASTM E 2068 }\end{array} & \begin{array}{c}\text { Initiate motion: } \\ 15 \mathrm{~N}(3.4 \mathrm{lf}) \\ \text { Maintain motion: } \\ 4 \mathrm{~N}(1.0 \mathrm{lbf})\end{array} & 70 \mathrm{~N}(15.7 \mathrm{lbf}) \text { max. } & \\ \hline \begin{array}{c}\text { Locks: } \\ 40 \mathrm{~N}(9.0 \mathrm{lbf})\end{array} & 100 \mathrm{~N}(10.1 \mathrm{lb}(22.5 \mathrm{lbf}) \text { max. max. }\end{array}\right)$

| Water Penetration, per ASTM E 547 at 360 Pa ( 7.52 psf) | Pass | No leakage | 2 |

## SERIES 5000 TESTING

Test Report No: C942901-301-4 Report Date: 01/20/14 Revision 1 Datee $01 / 23 / 14$ Record Retention End Date: $01 / 23 / 17$
Page 6 of 7
7.0 Test Results: (Continued)

### 7.0 Test Results: (Continued)

Note 1: The tested specimen meets (or exceeds) the performance levels specified in AMMA/WDMA/CSA 101/LS2/A440 for air leakage resistance

Note 2: Without insect screen.
Note 3: The deflections are not limited for the product designation shown according to AAMA/WDMA/CSA 101/LS2/A440-05. The deflection limits reported are applicable to the product designation shown per AAMA/WDMA/CSA 101/IS2/A440-08.

Note 4: Loads were held for 10 seconds.
Note 5: Tape and film were used to seal against air leakage during structural testing. I our opinion, the tope and film did not influence the results of the test

| Title of Test | Results | Allowed | Note |
| Uniform Load Deflection, per ASTME 330 Bottom Rail |  |  |  |
| +2520 Pa ( +52.63 psf ) | 1.2 mm (0.04") |  |  |
| -2520 Pa (-52.63 psf) | 1.2 mm (0.04") |  |  |
| Yerticalmullion |  |  |  |
| +2520 Pa ( +52.63 pss ) | $11.6 \mathrm{~mm}\left(0.455^{\circ}\right)$ |  |  |
| -2520 Pa (-52.63 psf) | $11.0 \mathrm{~mm}\left(0.43^{\circ}\right)$ | N/A | 4,5,6 |
| Uniform Load Structural, per ASTM E 330 Bottom Rail |  |  |  |
| +3600 Pa (+75.19 psf) | 0.1 mm (0.01") | $3.6 \mathrm{~mm}\left(0.14^{\prime \prime}\right)$ max |  |
| $-3600 \mathrm{~Pa}(-75.19 \mathrm{psf})$ | 0.1 mm (0.01") | $3.6 \mathrm{~mm}\left(0.14^{\prime \prime}\right)$ max |  |
| Yertical mullion |  |  |  |
| +3600 Pa (+75.19 psf) | $0.5 \mathrm{~mm}\left(0.02^{\prime \prime}\right)$ | $4.8 \mathrm{~mm}\left(0.19^{*}\right)$ max |  |
| -3600 Pa (-75.19 psf) | $0.5 \mathrm{~mm}\left(0.02^{\prime \prime}\right)$ | $4.8 \mathrm{~mm}\left(0.199^{*}\right)$ max | 4, 5, 7 |

Note 1: The tested specimen meets (or exceeds) the performance levels specified in AAMA/WDMA/CSA 101/LS.2/A440 for air leakage resistance.
Note 2: The client opted to start at a pressure higher than the minimum required. Test results are reported under Optional Performance.
Note 3: Without insect screen.
Note 4: Loads were held for 10 seconds.
Note 5: Tape and film were used to seal against air leakage during structural testing. In our opinion, the tape and film did not influence the results of the test.
Note 6: The deflections reported are not limited by AAMA/WDMA/CSA 101/IS.2/A440 for this product designation. This deflection data is reported for special code compliance and information only.
Note 7: When different allowable limits are specified for multiple product designations or specifications, the limits reported are the more restrictive

Architectural Testing will service this report for the entire test record retention period. Test records that are retained such as detailed drawings, datasheets, representativ samples of test specimens, or other pertinent project documentation will be retained by Architectural Testing, Inc. for the entire test record retention period.

This report does not constitute certification of this product nor an opinion or endorsement by this laboratory. It is the exclusive property of the client so named herein and relates only to the specimen(s) tested. This report may not be reproduced, except in full, without the written approval of Architectural Testing, Inc.

### 3.0 Project Summary:

3.1 Series/Model: 5000 Series
3.2 Product Type: Thermally Broken Aluminum

XoxX Casement Combination Window
3.3 Compliance Statement: Results obtained are tested values and were secured by 3 Compliance Statement: Results obtained are tested values and were secured by
using the designated test methods. The specimen tested successfully met the using the designated test methods. The specimen tested successfully met the
performance requirements for an AAMA/WDMA/CSA 101/LS. $2 /$ A440-08 rating of performance requirements for an AAMA/WDMA/CSA 101/LS. $2 /$ A440-08 rating of
Class C - PG50: Size Tested $3251 \times 1510(128 \times 60)-$ Type C, and an AAMA/WDMA/CSA 101/IS.2/A440-05 rating of C-C50 $3251 \times 1510$ ( $128 \times 60$ ).
3.4 Test Dates: $06 / 17 / 2013-06 / 21 / 2013$
3.5 Test Record Retention End Date: All test records for this report will be retained until June 21, 2017.
3.6 Test Location: Architectural Testing, Inc. test lacility in Fresno, Califormia.
3.7 Test Sample Source: The test specimen was provided by the client.
3.8 Drawing Reference: The test specimen drawings have been reviewed by Architectural Testing and are representative of the test specimen reported herein. Test specim located in Appendix B. Any deviations are documented herein or on the drawings.

## SERIES 5000 TESTING

Test Report No: C9424.01-301-44 Report Date: 01/21/14
Record Retention End Date: $06 / 21 / 17$ Record Retention End Date: $06 / 21 / 17$
5.0 Test Specimen Description: (Continued)
5.0 Test Specimen Description: (Continued)
5.7 Hardware:

| Deseription | Quantity | Location |
| :---: | :---: | :---: |
| Hollow bulb vinyl | 1 row | Active panel stiles and rails. |
| Hollow bulb vinyl | 1 row | Frame at panel opening perimeter. |

5.5 Glazing: No conclusions of any kind regarding the adequacy or inadequacy of the glass in any glazed test specimen(s) can be made

| Glass <br> Type | Spacer <br> Type | Interior <br> Lite | Exterior <br> Lite | Glazing Method |
| :---: | :---: | :---: | :---: | :---: |
| $1^{\prime \prime}$ IG | Aluminum | $1 / 8^{\prime \prime}$ clear <br> annealed | $1 / 8^{\prime}$ clear <br> annealed | Glazing was set from the exterior <br> onto $3 / 8^{\prime}$ wide double-sided foam <br> tape sealed at the corners with <br> silicone; secured using a snap-fit <br> glazing bead with a rubber gasket <br> against the glass. |

| Location | Quantity | Daylight Opening |  | inches |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |
| Panels | 3 | $695 \times 1386$ | $27-3 / 8 \times 54-9 / 16$ | $5 / 8^{*}$ |
| Fixed | 1 | $752 \times 1441$ | $29-5 / 8 \times 56-3 / 4$ | $5 / 8^{*}$ |

5.6 Drainage:

| Drainage Method | Size | Quantity | Location |
| :---: | :---: | :---: | :---: |
| Weep Notch | $7 / 16^{*} \times 1 / 8^{*}$ | 2 | Sill exterior leg at fixed lite, 7/8 from each corner. |
| Weep Notch | $7 / 16^{*} \times 1 / 8^{*}$ | 6 | Sill exterior leg at vent openings, 7/8" from each corner. |
| Weep Notch | $7 / 16^{*} \times 1 / 8^{*}$ | 6 | Bottom rail exterior glazing track leg, $7 / 8^{\prime \prime}$ from each corner. |
| Weatherstripping | $1^{\prime \prime}$ Gap | 6 | Bottom rail, $1^{*}$ from each corner. |
| Weatherstripping | 1/4* Gap | 6 | Stiles, 1" from each top corner. |

| Description | Quantity | Location |
| :---: | :---: | :---: |
| Locking handle assembly | 6 | $14^{7}$ from each end of lock stiles; each attached with two $10-24 \times 5 / 8^{*}$ Phillips flat head screws. |
| Strike plate | 6 | Opposite locks; each attached to vertical lock mullion with two \#10-24 x 5/16" Phillips flat head screws. |
| Multi-arm hinge assembly | 6 | Attached using five \#10 $\times 7 / 16^{6}$ squaredrive self-drilling pan head screws in the top and bottom rails, and four \#10 $x$ $5 / 8^{*}$ square-drive self-drilling pan head screws in the frame. |

5.8 Reinforcement: No reinforcement was utilized.
5.9 Screen Construction: No screen was utilized.

### 6.0 Installation:

The specimen was installed into a Douglas fir buck The rough opening allowed for a $1 / 4^{\text {" }}$ shim space. The exterior perimeter of the window was sealed with silicone.

| Location | Anchor Description | Anchor Location |
| :---: | :---: | :---: |
| Nail fin | $1 / 4^{*} \times 2^{*}$ Phillips flat head screw | $1-1 / 2^{-\prime}$ from each corner and <br> spaced $8-1 / 2^{*}-13^{-}$ on center. |

7.0 Test Results: (Continued)

| Title of Test | Results | Allowed | Note |
| :---: | :---: | :---: | :---: |
| Optional Performance (Continued) |  |  |  |
| Uniform Load Structural, per ASTM E 330 Hinge Stile |  |  |  |
| -3600 Pa (-75.19 pst) | 0.1 mm (0.01) | $4.5 \mathrm{~mm}(0.18)$ |  |
| +3600 Pa (+75.19 psf) | $0.0 \mathrm{~mm}\left(0.00^{\circ}\right)$ | $4.5 \mathrm{~mm}\left(0.18{ }^{\prime}\right)$ |  |
| Lock-to-Fixed Mullion |  |  |  |
| -3600 Pa ( -75.19 psf ) | $0.0 \mathrm{~mm}\left(0.00^{\circ}\right)$ | $\left.4.4 \mathrm{~mm}(0.17)^{\prime}\right)$ |  |
| +3600 Pa ( +75.19 ps ) | $0.3 \mathrm{~mm}\left(0.011^{-}\right)$ | $4.4 \mathrm{~mm}\left(0.17^{\prime}\right)$ |  |
| Fixec-to-Hinge Mullion |  |  |  |
| -3600 Pa ( $\mathbf{- 7 5 . 1 9} \mathrm{psf}$ ) | 0.3 mm (0.01) | $4.4 \mathrm{~mm}\left(0.17^{\circ}\right)$ |  |
| +3600 Pa ( +75.19 psf ) | $0.0 \mathrm{~mm}\left(0.00^{\circ}\right)$ | $4.4 \mathrm{~mm}\left(0.17{ }^{\text {c }}\right.$ ) |  |
| Lock-to-Lock Mullion |  |  |  |
| -3600 Pa ( -75.19 psf ) | $0.6 \mathrm{~mm}\left(0.03^{*}\right)$ | $4.4 \mathrm{~mm}\left(0.17^{\circ}\right)$ |  |
| +3600 Pa ( +75.19 ps ) | $0.0 \mathrm{~mm}\left(0.00^{\circ}\right)$ | $4.4 \mathrm{~mm}(0.17)$ | 5,6 |

Note 1: The tested specimen meets (or exceeds) the performance levels specified in AAMA/WDMA/CSA 101/LS2/A440 for air leakage resistance.

Note 2: Without insect screen
Note 3: The client opted to start at a pressure higher than the minimum required. Test results are reported under Optional Performance.

Note 4: The allowable limits reported are the more restrictive according to either AAMA/WDMA/CSA 101/IS.2/A440-05 or AAMA/WDMA/CSA 101/IS2/A440-08, for the respective product designations given. The data reported may also be used for specia. code compliance and informational purposes.

Note 5: Loads were held for 10 seconds.
Note 6: Tape and film were used to seal against air leakage during structural testing. In our opinion, the tape and film did not influence the results of the test
