

SMART QUOTE JUST GOT SMARTER

Effective 3/1 All Weather Architectural Aluminum is pleased to announce two important updates to the All Weather Smart Quote software system.

First, NFRC Ratings for U Factor, SHGC and VLT will be added to the end of each line item on your SQ Quote, so you can see the energy performance of the All Weather door or window system selected.

Second, we have added a Glass Quick Picks (GQP) option to make selecting glass quicker and easier. The GQP is a drop-down menu that allows you to select/specify the Glass Combo, Glass Airspace and Glass Tempering options including WUI. The most popular options are shown within each category. You simply choose the option that best meets your project needs.

If you have any questions, please contact your Outside Sales Representative.
