SERIES 7200 PIVOT DOOR SYSTEM

777 Aldridge Road | Vacaville, CA 95688 | 800.680.5800 | www.allweatheraa.com

The new Series 7200 Pivot Door system is a unique alternative to traditional French or hinged doors. The Series 7200 allows for a wider and taller opening since the single panel operates around a pivot at the top and bottom of the door rather than being hinged to the jamb.

Offering uninterrupted views and increased daylighting through a single pane of glass, the Series 7200 Pivot Door merges indoor/outdoor spaces with an elegant, modern style. The innovative Series 7200 can be used as a front, internal or patio door making it the ideal solution for residential and commercial applications.
